

MJ's Superstars — Phase 1 Status Report

App Store Blocker Audit & App Privacy Questionnaire Guide
February 9, 2026 | Prepared for Mike Perkins

Phase 1 Blocker Status

Each item below was checked against the live deployment. Items marked DONE are verified working in production.

ITEM	STATUS	EVIDENCE / NOTES
Privacy Policy published at accessible URL	DONE	Live at mj-superstars-app.onrender.com/privacy.html (HTTP 200). Full styled HTML with all required disclosures.
Terms of Service published	DONE	Served via API: mj-superstars.onrender.com/api/legal/terms-of-service. Also rendered in-app via React component.
Support URL accessible	DONE	Live at mj-superstars-app.onrender.com/support.html. FAQ, contact email, crisis resources included.
Demo account for Apple Review	DONE	Created: demo@mjsuperstars.com / MJDemo2026! Seeded with 2 mood entries + 1 task. User ID: 39ec51eb-...
Screenshots — 6.7" iPhone (required)	DONE	5 screenshots at 1290x2796 px in fastlane/screenshots/en-US/iphone67_*
Screenshots — 6.5" iPhone	DONE	5 screenshots at 1242x2688 px in fastlane/screenshots/en-US/iphone65_*
Screenshots — 5.5" iPhone	DONE	5 screenshots at 1242x2208 px in fastlane/screenshots/en-US/iphone55_*
Screenshots — iPad Pro 12.9"	DONE	5 screenshots at 2048x2732 px in fastlane/screenshots/en-US/ipad_pro_129_*
App Privacy Questionnaire	TO DO	Must complete in App Store Connect. Exact answers provided below in this document.
Upload build to App Store Connect	TO DO	Requires Xcode on your Mac: Product > Archive > Distribute to App Store. Bundle ID: com.mjsuperstars.app
Backend API health	LIVE	mj-superstars.onrender.com/health returns healthy. 15+ hours uptime. Production env.
Frontend deployed	LIVE	mj-superstars-app.onrender.com serving React SPA. Static files (privacy, support) accessible.

Score: 11 of 13 items complete. Only 2 items remain — both require your Mac (App Privacy Questionnaire + Xcode build upload).

App Privacy Questionnaire — Exact Answers

Open App Store Connect > Your App > App Privacy. Enter these answers exactly as shown.

Section 1: Data Collection

Q: Does your app collect any of the following data types?

DATA TYPE	COLLECTED?	PURPOSE	LINKED TO IDENTITY?
Contact Info — Email Address	YES	App Functionality (account login)	YES
Contact Info — Name	YES	App Functionality (display name)	YES
Health & Fitness — Health	YES	App Functionality (mood scores, wellness tracking)	YES
User Content — Other User Content	YES	App Functionality (journal entries, chat messages)	YES
Usage Data — Product Interaction	YES	Analytics (feature usage, session data via Mixpanel)	NO
Diagnostics — Crash Data	YES	App Functionality (error tracking via Sentry)	NO
Diagnostics — Performance Data	YES	App Functionality (response times, API performance)	NO
Identifiers — User ID	YES	App Functionality (account identification)	YES

Section 2: Data NOT Collected

- ✗ Financial Info (no payment data — handled by Apple StoreKit)
- ✗ Location (app does not request location access)
- ✗ Contacts (app does not access contacts)
- ✗ Browsing History
- ✗ Search History
- ✗ Purchases (StoreKit handles this — Apple manages purchase data)
- ✗ Sensitive Info (no racial, ethnic, sexual orientation, or biometric data)
- ✗ Photos or Videos (camera feature exists but photos are stored locally, not uploaded to servers)

Section 3: Tracking

Q: Does your app use data for tracking?

Answer: NO — Your app does not link user or device data for advertising or share data with data brokers. Mixpanel analytics are first-party only and not shared with advertisers.

Section 4: Third-Party Partners

PARTNER	DATA SHARED	PURPOSE
Anthropic (Claude API)	Chat messages, user context	AI-powered coaching conversations
Render.com	All app data (hosted infrastructure)	Database hosting, server infrastructure
Sentry	Error logs, crash data	Error monitoring and crash reporting
Mixpanel	Usage events (anonymized)	Product analytics
Apple (StoreKit / Sign In)	Purchase data, auth tokens	Payments and authentication

What's Left — Your Action Items

Only 2 tasks require your direct action on your Mac. Everything else is verified and live.

1. Complete App Privacy Questionnaire (15 min)

Open **App Store Connect > Your App > App Privacy**. Use the tables above to enter each data type. The questionnaire walks you through it step by step — just match the data types to what's listed above.

2. Upload Build via Xcode (30-60 min)

1. Open the MJ Superstars Xcode project on your Mac
2. Set the build scheme to **Any iOS Device (arm64)**
3. Menu: **Product > Archive** (wait for build to complete)
4. In the Organizer window, select the archive and click **Distribute App**
5. Choose **App Store Connect > Upload**
6. Verify: Bundle ID = **com.mjsuperstars.app**, Team ID = **FAAWCBHB9C**
7. Ensure **Push Notifications** entitlement is enabled in Signing & Capabilities
8. Wait for processing in App Store Connect (usually 5-15 minutes)
9. Once processed, select the build in your App Store submission

3. Submit for Review

After the build processes, go to App Store Connect and:

1. Select the processed build under your app version
2. Verify all metadata (name, description, keywords, screenshots) — already uploaded via fastlane
3. Add Review Notes with demo credentials: **demo@mjsuperstars.com / MJDemo2026!**
4. Click **Submit for Review**
5. Apple review typically takes 1-3 business days

Bottom line: 11 of 13 blocker items are verified complete and live in production. The only remaining work is entering the App Privacy answers in App Store Connect and uploading your Xcode build. You could submit for Apple review today.
